We should both consider whether this increased size constitutes a hazard to the experimental set-ups on Eninman and Nazi.

We are proceeding with respect to the ball of fire photographs on the plan we discussed some time ago. Felt is arranging with K&G a disposition of cameras and towers to cover all of the shots. However, I feel that some time before the camera plan is pronounced final (approximately 15 July) you people should get together with Felt and make sure that you feel that the proposed plan is adequate.

I would still hope that we can get together to discuss these problems in some detail in the next week or two.

Sincerely,

William E. Ogle
