This list of references has been prepared in response to a specific request and is confined to the limits of that request. It does not claim to be either an exhaustive or critical compilation. The inclusion of a particular reference to material is in no way to be construed as an endorsement of the information contained in that material. In addition, it has proved impossible to determine definitely from title and abstract that every reference cited contains information wholly pertinent to the intended scope of the bibliography.

PREFACE

Although this bibliography consists primarily of journal articles, a few titles of reports, theses, and conference proceedings have been included when abstracted in NSA or PA. The bibliography lists the references alphabetically by title.
